

HEALTH SERVICES ADVISORY COMMITTEE

Justification and Approach

The program has an operational Health Advisory Committee whose main purpose is to assist in the planning, operation and evaluation of the health services component and can advise on all service areas of the program as needed. The Advisory assists in the planning for the upcoming year by reviewing and providing input into the policies and procedures utilized to direct the program. The Multi-Advisory is utilized throughout the program year as new directives of compliance are issued. The committee is made up of parents and professionals from various fields. The committee meets at a minimum of twice a year, with subcommittees and additional meetings, as needed.
